Importance: Low

This young man lives in Bethune Sask.
He was diagnosed with PKD @ the age of 9.
In 2012 his kidney's failed & he recieved heamo-dialysis @ Regina general for that yr.
2013 to present peritoneal has been performed at home..allowing him to work full time again.
This last 6 months his health is quickly deteriorating...He needs a kidney very badly.
The Drs. have been wonderful.
The transplant team in Regina are somewhat less desirable...

Thankyou
Angela Herzberg
