

MINISTRY OF HEALTH

ESTIMATES FOLLOW-UP: MAY 9, 2018

1. What is the average capacity at the Dubé Centre for the last three fiscal years (2015-16, 2016-17, 2017-18)?

- The average operating census at the Dubé Centre for 2015-16 was 67.
- The average operating census at the Dubé Centre for 2016-17 was 68.
- The average operating census at the Dubé Centre for 2017-18 was 66.

2. How many patients were admitted to Saskatchewan Hospital North Battleford (SHNB) rehabilitation beds in each of the last three fiscal years?

The number of patients admitted to rehabilitation beds at SHNB in the last three years is as follows:

2014-15	2015-16	2016-17
31	40	28

Additional information:

The number of rehabilitation patients admitted to SHNB is limited and varied yearly. This is in part due to the number of Long Term Detention Ordered patients admitted (for one-year periods). A larger factor recently is the number of Not Criminally Responsible (NCR) patients under the Saskatchewan Review Board. SHNB has no control of these inward flows. Discharge of these and other long stay patients at SHNB remains difficult due to the complex nature of the cases and supports that would be required.

3. In each of the last three fiscal years, how many people had two or more acute inpatient hospitalizations in a designated mental health bed in a Saskatchewan hospital?

	2014-15	2015-16	2016-17
Two or more acute inpatient hospitalizations in a designated mental health bed	725	763	915

4. In each of the last three fiscal years, how many people had an acute inpatient hospitalization in a designated mental health bed in a Saskatchewan hospital where the entire hospital stay was more than 60 days?

	2014-15	2015-16	2016-17
# of people with an acute inpatient hospitalization in a designated mental health bed, with stay more than 60 days	175	175	144
