

Fred Bradshaw
Chairman
Standing Committee on Crown and Central Agencies

Dear Mr. Bradshaw,

In our most recent attendance of the Crown and Central Agencies committee dated September 17, 2019 there was additional information requested that SaskPower officials did not have at the time. I can advise the following information has been provided by SaskPower officials:

How many high-risk permits are issued?

High Risk Permits cleared without Inspection due to denied access/unable to gain access:

	Unable to Gain Access	Total Permits Issued	Percent of Total
Gas Permits	936	78,207	1.2%
Electrical Permits	161	136,151	0.1%
Homeowner Permits	48	2,478	1.9%
Total Permits	1145	216,836	0.5%

The project that is being proposed by CGW Golden Wheat International Trading?

CGW Golden Wheat International Trading Ltd has proposed a Solar project with 495 kw Generation capacity.

Are any reports available to the committee in terms of reporting from the First Nations Power Authority to SaskPower?

SaskPower is one of several partners of the FNPA. As a non-profit organization the FNPA do comply with financial reporting requirements of non-profit organizations set out by Revenue Canada. A request directly to the FNPA would be required to ask for financial information on the FNPA.

Yours sincerely,

Dustin Duncan
Minister Responsible for SaskPower Corporation

c: M.J. (Mike) Marsh, President and Chief Executive Officer, SaskPower
