Subject: Traffic safety act

Hello

My name is Ryan lensen I was involved in an incident with the Saskatoon police service a couple of months ago in which a unmarked police half ton truck went through red light and almost hit me so I filed a complaint against them and they came back that they had the right to go through that red light with no lights and sirens, I would love to see that law dismissed for public safety as I have already been in an accident with a red light and almost killed me.

The other thing also is the police able to talk on cell phones while driving, I think they should have to have blue tooth just like everybody else in this province, in order to talk on the phone.

I would like to see these matters presented to all media and warn public about these matters and getting them fixed by our government before disasters happen or people being killed by their actions.

Lets keep the community safe lets change these NOW!!!!

Thanks very much Ryan lensen
