- Hi, to the Minister of Highways DON MCMORRIS Govt. of Sask., Premier of SASK.BRAD WALL. How about Lets' MAKE a "DEAL". Both you and your family move to MIDALE, Brad,you drive to ESTEVAN, twice a day. DON you to WEYBURN twice a day, between the hours of 7:00am. and 7:30pm. Then after a month of driving on 39 Highway,only 30 miles one way. That's not even the rest of #39.Watching people talking on phones,playing on their phones, Drunk,drugged up,and 10 semis,in a row. Lets see how long you guys' last driving,thinking is it going to be me ,am I going to make it home, oh my God,am I going to make this trip.That is what I think of everytime I leave my street. What a feeling,you should experience this,for years I have and it is not good.
- The GAS TAX,that was to fix the highways" WHAT EVER HAPPENED WITH THIS MONEY GUYS". What more can I say!

- I feel it is important to twin highways #39 and #6 as traffic has increased on these highways especially the amount of semis. There has been on more than one occasion that has been 2 semis and our vehicle straight across from each other and we are driving on the shoulder. There has been an increased amount of fatal accidents and too many close calls for us and many other vehicles. The longer it takes to twin the more expensive it will become and the amount of fatal accidents will increase! I feel the time to twin is NOW!!

- I think all Government people who are involved with this decision are absolutely clueless and need to spend a full week themselves travelling these Highways...this is a disgrace and for the taxes we pay for, exactly what do we get out of that except an all expensed paid-fuel-travel-hotel for the Government yet to discuss this issue again.....How about wait until more are killed-families are torn; people travel these roads every day scared, just to make a living for their families they hope to see at the end of the night- while you sit at your meetings and ponder.....

- This stretch of highway is a dangerous drive. It is necessary to drive this highway for thousands, to reach the city etc. The death count is published and sadly too high, but please recognize the 'Scares' that are not reported. At least once per 4 drives on this highway I dodge onto the far shoulder /ditch to avoid oncoming traffic of people not paying attention or even looking up AND dangerous oncoming passing. These are on good conditions days. Adding a light rain or possible ice makes for a dangerous drive that I only make when absolute necessary. If my children or husband were to be in an accident tomorrow on that highway I would not leave the legislation steps until there is a change. Money vs a Life. How is this even a discussion? Is greed that powerful?

- I drive a school bus and have to cross highway 18 several times to get to my pickups. It is becoming increasingly difficult to find a break in the traffic flow to safely do this. I also find that people want to get past a school bus (goes too slow) and have no qualms about passing or pulling in front of the bus regardless of the safety of it. Last year I drove a bus that also took me down highway 39 and the same problems were encountered. A bus was struck near Midale and fortunately no lives were lost but the outcome could have been serious. "Arrive alive" is becoming a crap shoot.

- This area generates enormous oil revenue and should be twinned to support the volume and over sized vehicles using this highway...plus I'm sick and tired of going to the funerals of the young people who traverse that highway daily.
- [Mary-Lou Rosengren](#)ESTEVAN, CANADA
 - about 2 hours ago
 - Liked1
- We've watched this highway become busier every year and with the non-stop heavy traffic (semi trailers, oilfield equipment) it is a scary experience. When there's a convoy of 20 vehicles and no safe way to pass drivers get impatient, careless and frustrated and that's when people die. As one of the main highways into the U.S. the only smart thing to do is twin this highway from the US border to Regina. Passing lanes are just a waste of money - like putting a bandaide on a severed artery!!
- [Jenna-Lee Ganje](#)WEYBURN, CANADA
 - about 3 hours ago

- First I think there needs to be more policing of this highway. Everytime I travel this highway I think there is something wrong with my speedometer because I go about 105 to 107 and semi's pass me like I'm going 90. No wonder there are so many people killed on this highway. If they twin it then at least if a speeding semi passed them a person would have a chance of surviving. Because even if the semi driver makes the mistake and he is in collision with a smaller vehicle, the smaller vehicle will lose and people will get killed.

- I was born and raised in Estevan, Saskatchewan with my family still residing their. I frequently come home to Estevan to visit family. The trip from Saskatoon to Regina is smooth sailing and provides higher traffic volumes to travel also making me feel safer. However, on the drive from Regina to Estevan the highway is filled with semis, oil rigs, and trucks which make it unsafe to pass in even the most stable weather conditions. With the increased amount of oil field production in Estevan, I believe the twinning of the highway will allow for further growth and economic development, while providing safety to people such as myself who want to travel to Estevan to visit family and friends.

- [Janet Harris](#) ESTEVAN, CANADA
 - 4 days ago
 - Liked0
- This is a very dangerous road and unfortunately, it is not going to get any better. As the projections for the global Transportation Hub in Regina indicate that further growth is sure to occur, it will increase the traffic on this highway. In addition, many of the trucks are carrying equipment for the carbon capture project or the oil fields that are longer, higher and/or wider than conventional roads thereby decreasing visibility when trying to pass. Something has to be done and sooner rather than after more people have died.
- [lonnie barber](#) ESTEVAN SK, CANADA

 - Safety concerns. Every time I have to drive to Regina there is always some idiot who passes too many vehicles in a row or with poor visibility. And because of the high number of semis on the road because it is a major trade route in/out of the U.S., this just compounds the problem. Although this highway twinning would be very, very expensive, I am sure our government has spent lots of money on many less worth-while projects.

 - Saving lives is the only reason needed to sign this petition. There have been too many losses on these Hiways and with the increase in heavy truck traffic due to the oilfield as well as being an International Trade Corridor where heavy truck traffic is steadily on the increase we can only expect the fatality rate to increase as well. Anyone who travels on these Hiways, be it Provincial, Extra Provincial or International has an interest in the safety for the protection of their lives and should sign this petition. We need to get at least 500 to 600 thousand signatures to make this petition effective. This should be easy to attain. I urge everyone to sign immediately and share with all your friends on FB, Twitter or E-Mail. We can make it happen.

 - Yes, it is time to put money back into this region, since it generates so much revenue for the province. There also needs to be proper interchanges on the truck route. These intersections will take even more lives on this highway if they are left as planned. Save some lives and invest in proper infrastructure for this booming region.

- I was born and raised in the Estevan area, and although no longer live there, have my family and friends on #39 / #6 (up to #1), traveling it often. This road has always been fairly busy with treacherous conditions most of the winter months. When we come home to visit now, it is unbelievable to see how much worse it becomes every year. The drivers are going too fast, traffic is too heavy, increasing volume of trucks / semis, weather is a factor for most of the year – something needs to be done. As the additional traffic is mainly due to the border being a main corridor for cross border trade, if the government will be benefiting from the growing industries / revenues, this money should be put back into the areas being negatively affected by this – please twin the highway! Passing lanes and stop signs on the highways are not the answer. If one more life could be saved...

- There are more and more semi's and oilfield traffice using this highway, especially from Estevan to the Corrine, SK corner. With the big truck's travelling at a slower pace then most smaller traffic, there are going to be more fatallities. The vehicles are travelling like 'packs', making it harder to pass one at a time. People are becoming more impatient and taking more chances. I drive this highway at least 3 times a week and it is becoming a horrible situation. My suggestion would either be twinning the highway or making passing lanes available.

 - I drive down this stretch of highway every 2 weeks to visit my in laws in Medicine Hat, AB. The danger in doing so seems to increase with every trip. Between the non-stop semi traffic and careless passing, my trips have become less and less frequent. As one of the busiest places in Canada right now, with a huge Oil Boom, I find it a necessity to have roads that can handle the amount of traffic they are receiving. Thanks for your time.

 - I am signing this because just this year on April 18,2013 I lost my best friend my sister on highway 39 at Midale due to a head on collision. She was killed on impact. She left to mourn her 7 children and 5 grandchildren. She was 44 years old who had a lifetime ahead of her. This could of been prevented had the highway been twinned. Instead we have to sit back and worry about our own safety driving our kids on this highway and why should

we have to feel so scared. For instance in highway 39 I was waiting to continue on the highway one day when a car in front of me was turning left waiting as traffic didn't allow him and to the right of me was a semi hauling a trailer turning right and up behind me comes a semi who never slowed down I just lost my sister and all I could see was a semi coming up behind me not slowing Down and at the last minute suicide passed me on the right side. I'm sorry I'm supposed to feel safe after this I think not this highway needs to be twinned. I don't want to leave my children mourning my death because people don't know how to drive properly.

- Every single time we travel that highway we see an incident or have been affected by a close call. My husband has witnessed several accidents including one horrific accident. He has also been a part of providing first aid and care for several people on that road. We have also helped elderly people that have been stranded and several who need to change a tire but unable to do so because there is no adequate shoulder. We work very hard in order to pay our taxes to the province, please twin this highway and put other projects on the back burner to do so. You can't possibly begin to educate drivers from all over North America for this highway nor can you have a police force so large to keep the intoxicated/drugged people off the roads, so why not make it safer by giving us more room to react in the event that our lives are threatened.
