

Good evening, my name is Shon Crumley and I am the owner of a towing company. I have been in the industry for more than 10 years now and have noticed how much more dangerous our jobs are than when I started. I am happy to hear that there has been a group put together and hope that they will be able to help the towing industry as well. Since Jan. 1 there has been around 25 tow operators killed while working the white line in N America this year. The fines need to be ones that send a clear message, but also need to be enforced. I would like to see lights on tow trucks changed to a different color to separate them for construction vehicles, oversized loads, etc. I have met with CAA management in Regina on this matter and it is a growing concern for us all. Nobody slows down for tow operators on the side of the highway.

I would invite you to call a tow company, follow us around, we are out there day in and day out and may be able to offer some suggestions or you may be able to witness what needs to be done. If its a tow company or a highway crew we all have the same goal.... to go home to our families.

If you have any questions or would like to hear some of my suggestions I can be reached at 306-520-7500

Thank you for your time
Shon Crumley
